

## JS Air Curtains Limited - Environment & Sustainability Policy Statement

**JS Air Curtains Limited is committed to respect the environment.**

- **We care** about our community, our customers and our planet
- **We understand** the need to protect our natural environment and limit the day-to-day impact of our business
- **We aim to follow and champion** good sustainability practices, reduce the environmental impacts of our activities, and give something back to our community and the environment

We uphold sustainability practices by:

- Ensuring we comply with all relevant environmental regulations and legislation
- Reducing our consumption of resources, including energy, water, and other raw materials, and ensuring the efficient use of the resources that we do consume
- Ensuring consideration is given to the environmental, social, and ethical impacts of the goods and services we buy
- Working with our suppliers to reduce the impact of our supply chain and to encourage them to improve their sustainable and environmental practices
- Managing waste generated from our business in line with the waste hierarchy; by avoiding waste in the first place, then giving priority to minimising, reusing, recycling, recovery of waste, and finally ensuring the safe disposal of waste
- Regularly reviewing our practices with the aim of continually improving the impact of our business activities on the environment, local community, and wider society
- Measuring and taking action to reduce the emissions associated with our business activities
- Supporting social and environmental projects and initiatives within our community, or in wider society
- Educate and train and develop our staff, to raise awareness of good practice in environmental issues, to enable them to contribute to the Company's aims and apply good practice in their personal lives
- Promote air curtains technology to enable our customers to minimise their own environmental impact

As an IMPACT CERTIFIED organisation, JS Air Curtains is committed to transparency, accountability and continuous improvement in sustainability. This ensures our air curtain solutions not only enhance comfort and performance, but also support more responsible, energy-efficient buildings.
